

shoelaces for special shoes

Our shoelaces for police, tactical military and hunting shoes are made of polyester, modified hydrophobic, where a polyamide filling is used for better strength. The entire assortment of hydrophobic laces meets the requirements of the GORE Company. The abrasion resistance of the outer layer in tests where the standard is $\geq 20,000$ for our laces was higher than 60,000. For fire fighters, we produce NOMEX laces with polyester filling, which is treated against fire. The laces feature a denser weave than traditional shoelaces, making them suitable for the purposes. They are available in different lengths and colours, thanks to which they adapt to different types of shoes. The termination is celluloid in a width of 20 mm. It is also possible to produce flat or oval shoelaces according to the requirements of the shoe manufacturer.

TYPE ROUND / FLAT , OVAL

MATERIAL WATERPROOF POLYESTER , POLYAMID, NOMEX

DIAMETER / WIDTH 4 MM, 5 MM / 8 MM

LENGTH FROM 70 CM TO 300 CM
