

shoelaces for ordinary shoes – flat

We produce flat shoelaces in various weaves, thicknesses and widths. We use knitting techniques - weaving and braiding. Flat laces are an excellent choice for those looking for durable and practical solutions for a variety of footwear. Their flat design provides a larger contact area with the eyelets of the shoe, which enables even distribution of pressure when tying and stabilizing the shoe. Thanks to the variety of colours and lengths, these laces can be the perfect accessory for both sports and leisure shoes.

We offer polyester, nylon, cotton laces as well as recycled polyester with a GRS certificate, with the option of waxing them or creating a text print on the lace. It is possible to choose from a wide range of colours and any length. We use celluloid tape (various colours) or metal or brass to end the laces.

TYPE FLAT
